To Whom It May Concern:

We have recently applied Cypher Environmental's new Dust Stop Municipal Blend (DSMB) product to on Victor Avenue within the municipality. DSMB was advertised to be competitive with chlorides in terms of cost and effectiveness and so far has performed well and exhibited excellent properties during and after rain. The product has stood up to the elements very well thus far, with periods of rain and hot, dry and windy weather.

We were also pleased with the great customer support, including both remotely and on-site assistance during the application of the product. We continue to see more than satisfactory results and are happy with the dust and erosion control provided.

We look forward to future projects involving Cypher Environmental.

Sincerely,

Rick Gamble  
Mayor
